EXECUTIVE SUMMARY

August was another important month for University Communications, as the University prepared for the Return to Grounds. There were several major announcements this month, notifying students, faculty, and staff of updates to plans for the fall semester.

With many major communications being announced in August, pageviews on UVA Today increased this month. August pageviews were up 12% from July, and 52% year over year from August 2019 with over 650K pageviews. Half of the top stories in August were related to operational announcements about the Return to Grounds plans for the fall semester. Also included in the top 10 stories from the month were three related to COVID-19 research and vaccines.

**Suggested action:** continue to keep the UVA community informed of updates to fall plans - these stories are well-read, and supplemented by the Return to Grounds emails. Readers are also interested in research, particularly Q&A stories (Dr. William Petri Q&A, Learning in the Midst of the COVID-19 Pandemic).

The Daily Report also saw improved performance in August, with Open Rate improving 9% (35% to 38%), and Click Through Rate improving 5% (19% to 20%) month over month. Within August, Open Rates were extremely consistent, ranging from a low of 35% to a high of 40%. This is a strong Open Rate that shows readers are particularly interested in consuming content at this point in time leading up to the Return to Grounds.

**Suggested action:** a strong Open Rate indicates that readers are really using the Daily Report as a resource and information hub for the latest updates on fall plans and COVID-19. Now more than ever, it is crucial to view the Daily Report as a means of distributing timely, relevant information to readers so that they have the latest updates on the fall semester.

A recent partnership with the Social Media analytics platform RivalIQ has allowed for expanded Social Media reporting and analysis. One finding from this month’s data is that while Link post types are our most popular type of post on Facebook (typically linking to a UVA Today story), Photo and Video content tends to outperform Links in terms of total reach and engagements. This is likely a preference of the Facebook algorithm, which would like to keep users on its own platform, consuming and engaging with content within Facebook itself, rather than sending them to another site.

**Suggested action:** look for opportunities to post more photo and video content. Since we know we will continue to post UVA Today stories which are typically Links, we may consider running a test where rather than posting the full Link to the website, we post the accompanying photo from the story, and only include a link within the text itself. This is likely to result in decreased site traffic to UVA Today from Facebook, but is worth a test to determine the impact on site traffic, reach, and engagement rate.

An additional feature of the RivalIQ platform is the ability to view Social Media performance against competitor benchmarks. In this month’s report, we have used the ACC landscape for benchmarking. Currently, UVA is about in the middle of the pack on Facebook and Instagram. This indicates that our social performance is healthy, but may have room for improvement.

**Suggested action:** begin following top-performing competitors’ social channels to see what type of content they are publishing and what they are doing well. On Facebook, Georgia Tech and Notre Dame are at the top of the ranks. On Instagram, Virginia Tech and Syracuse are top performers.

RESEARCH DIGEST OPEN AND CLICK THROUGH RATES BOTH INCREASED SLIGHTLY FROM JUNE TO AUGUST

AUGUST OPEN RATE IMPROVED 4% FROM JUNE (29% TO 30%)

AUGUST CLICK THROUGH RATE IMPROVED 7% FROM JUNE (16% TO 17%)
The below graph shows year to date reach and engagement rate for Social Media content. August reach and engagement rates remained flat month over month.

* Includes reach for posts on Facebook, Instagram, Twitter, and LinkedIn posted during each month. Twitter and LinkedIn track Impressions instead of reach, so for these platforms, Impressions = Reach for measurement purposes. Does not include Instagram Stories data.

**SOURCE:** Facebook Creator Studio, Instagram Insights, Twitter Analytics, LinkedIn Analytics, RivalIQ

**DATE RANGE:** 1/1/20 - 8/31/20
Looking at reach alone does not tell the full story of Social Media impact, as total reach is dependent upon the number of posts published within a month. If you post more often, reach will increase. For this reason, we also need to look at average reach per post, and average engagement per post.

* Includes reach for posts on Facebook, Instagram, Twitter, and LinkedIn posted during the month of June. Twitter and LinkedIn track Impressions instead of reach, so for these platforms, Impressions = Reach for measurement purposes. Does not include Instagram Stories data.

**AVERAGE POST METRICS - YEAR TO DATE**

Average reach per post and average engagements per post both improved slightly in August. This improvement was primarily driven by Facebook and LinkedIn.

**SOURCE:** Facebook Creator Studio, Instagram Insights, Twitter Analytics, LinkedIn Analytics, RivalIQ

**DATE RANGE:** 1/1/20 - 8/31/20
In August, we ranked 5th out of ACC schools in avg. number of engagements per Facebook post and were slightly above the landscape average. We
ranked 6th overall and were slightly below the landscape average for engagement rate.

Due to differences in publicly available data vs. private data, reported metrics for our competitive
landscape will differ from our private reporting. NC State not included due to missing data.
In August, we ranked 5th overall among ACC schools for engagements per post and engagement rate by follower, and exceeded the landscape average for both.

Due to differences in publicly available data vs. private data, reported metrics for our competitive landscape will differ from our private reporting. NC State not included due to missing data.
